PROFILE

I'm a junior software developer, experienced in software application design, with capabilities using and building APIs, working with backend frameworks like Django, frontend design, and working in a team.

TECHNICAL SKILLS

- Python
- Java
- Django
- HTML, JAVASCRIPT & CSS
- Relational Database
- Git & GitHub

PROJECTS

FinancelQ:

- Developed a full-stack Python web application to help keep track of finances.
- I utilised Django for the backend development side, and Bootstrap and HTML for the frontend development side while utilising MySQL for the data storing.

TradeLog:

- Developed a desktop application using JAVA to help journal traders' trades.
- I utilised MySQL for data storing and Java Swing to design a slick modern UI.
